1. Claims 1-22 are still pending for examination.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 22 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter including an intangible media such as a data signal or a carrier signal which is incapable of being touched or perceived absent the tangible medium through which they are conveyed. It is true that an article of manufacture and a machine-readable storage medium is a statutory category of the invention (2107.01 of the MPEP), however if the specification defines this machine-readable storage medium as a data signal or a carrier wave, this machine-readable storage medium is also intangible media which is a non-statutory subject matter. Thus, the claimed invention is directed to the code which is not a statutory subject matter because this code has not clearly claimed that they are executable by the computer. See section 2106 of the MPEP.

3. Applicant's arguments, see the applicant's remark, filed 7/5/05, with respect to claims 1-5 and 9-21 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

4. Claims 6 and 22 are rejected under 35 U.S.C. § 102(e) as being anticipated by Chandra et al. [U.S. Patent No. 6,457,047]. This reference has been used in the previous office action.

5. Chandra et al. anticipated (e.g., see Figs. 1-10) the invention substantially as claimed. Taking claims 6 and 22 as exemplary claims, the reference anticipated a method including the steps of:

- a) selecting a first data server (selecting one of application cache server) from the at least one additional data server based on specific predetermined criteria (e.g., see application cache servers and master application servers of Figs. 1-10);
- b) sending specific data from the main server (cache directory server) to the first data server (e.g., see 44 of Fig. 2, col. 3 (line 54) to col. 5 (line) to col. 7 (line 60));
- c) receiving at the main server a first request for the specific data, the first request being sent by an end user to the main server (e.g., col. 3 (line 54) to col. 5 (line) to col. 7 (line 60));
- d) selecting the first data server (48 of Fig. 2) as being suitable for providing the specific data requested by the end user; and
- e) sending instructions to the end user to request the specific data from the first data server (e.g. see 44 of Fig. 2, col. 3 (line 54) to col. 7 (line 60)).

6. Claims 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 1-5 and 9-21 are allowed.

A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) days from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
